Case 1: "To Cut or Not to Cut"

A 67-year-old male presents with conjunctiva growth. What imaging would you do? Is timing critical? Should we biopsy? What treatment options are available? How closely should we follow this patient?

Case 2: "Hole in One"

A 78-year-old male presents with blurred vision and dry eye after retina surgery. What diagnostic testing would you perform? What are the key parts of the slit lamp exam? What treatment options are available?

Ophthalmology Quicksand Chronicles

The Ophthalmology Quicksand Chronicles hosted by Cataract eye surgeons Nicole Fram, MD and Elizabeth Yeu, MD. Dr. Fram and Dr. Yeu will explore those pivotal moments that every surgeon will inevitably encounter. Every time you think you have it figured out, the eyeball humbles you. In each episode, Drs. Fram and Yeu will host an expert in the field and delve into those "quicksand" moments; more specifically, the surgeon will reflect upon the nuances and lessons learned from a surgical experience that ultimately helped them evolve as surgeons.
